The iProcureNet Community

iProcureNet, that is also a lively **community of experts** from practitioners' organisations, industry and academia, policy makers or engaged citizens – involved or interested in the procurement of security innovation. The community can connect, be informed, engage and collaborate with other stakeholders through the iProcureNet Online Platform (iPOP).

innovation by developing a European Procurer
Networking for security research services

www.iprocurennet.eu

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 832875.

iProcureNet

Procurement at the heart of security innovation

Europe is producing **high-quality, innovative security solutions**, but many of them never make it to the market. This is where procurers come in. Procurers can act as a catalyst for innovation, shaping the security market and enabling it to respond to ever new challenges.

iProcureNet aims to create an **ecosystem** of procurers, prescribers, legal advisors and other key stakeholders of security procurement, to share procurement trends and needs, and open pathways for joint procurement.

Start	1 May 2019
End	30 April 2024
Funding	H2020 Secure Societies programme
Budget	1,5M€
Partners	14 from 10 countries
Coordinator	French Ministry of Interior

Taking up the challenge

Pathways towards joint procurement

Cross-border security procurement has the potential to become a **catalyst for innovation**. iProcureNet will contribute to overcome the **current obstacles** on this way:

The iProcureNet bid

An innovative methodology

In an innovative **three-cycle process**, iProcureNet will map the European procurement environment, **compare national investment strategies**, **identify innovation needs**, and **analyse security markets**.

Security procurement practitioners as well as experts from academy and industry contribute to the development of common and standardised **joint procurement practices** and innovative approaches, and thus prepare a larger uptake and a common European security market.

iProcureNet Toolbox A methodology, guidelines and a knowledge base of procurement practices in Europe	Trainings, Workshops & Conferences Networking, dissemination, peer learning and capacity building
iProcureNet Network+Community Institutions and individuals involved in security procurement	Established Buyers Groups Countries which have found common ground and are ready to procure together
