Join us! The iProcureNet Community

iProcureNet, that is also a lively **community of experts** from practitioners' organisations, industry and academia, policy makers or engaged citizens – involved or interested in the procurement of security innovation. The community can connect, be informed, engage and collaborate with other stakeholders through the iProcureNet Online Platform (iPOP).

innovation by developing a European Procurer
Networking for security research services

www.iprocurenet.eu

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 832875.

iProcureNet

Procurement at the heart of security innovation

Europe is producing **high-quality, innovative security solutions**, but many of them never make it to the market. This is where procurers come in. Procurers can act as a catalyst for innovation, shaping the security market and enabling it to respond to ever new challenges.

iProcureNet aims to create an **ecosystem** of procurers, prescribers, legal advisors and other key stakeholders of security procurement, to share procurement trends and needs, and open pathways for joint procurement.

Taking up the challenge

Pathways towards joint procurement

Cross-border security procurement has the potential to become a **catalyst for innovation**. iProcureNet will contribute to overcome the **current obstacles** on this way:

AWARENESS & INFORMATION

Difficult access to innovation alongside daily duties

Lack of awareness of existing solutions and of joint procurement

PRACTICAL

Different **national priorities**

Lack of knowledge on other countries' practices and investment needs

LEGAL

Different **regulatory standards**

Different **implementation of European directives**

ECONOMIC

Unease of **suppliers** towards joint procurement due to **lack of experience** and **lower prices**

TECHNICAL

Different **technical standards**

The iProcureNet bid

An innovative methodology

In an innovative **three-cycle process**, iProcureNet will map the European procurement environment, **compare national investment strategies**, **identify innovation needs**, and **analyse security markets**.

Security procurement practitioners as well as experts from academy and industry contribute to the development of common and standardised **joint procurement practices** and innovative approaches, and thus prepare a larger uptake and a common European security market.

Start

1 May 2019

End

30 April 2024
